

Zero Client DVD Player Bundle

Engineered for Information Rich Environments Requiring External DVD Player Capabilities

ClearCube has many customers who want to use DVD drives to read files that are transferred from place to place via DVD discs. The largest market segment is healthcare, where X-rays, digital scans, and new patient records are imported via DVD. Other use cases have been identified in training, transportation, manufacturing, and government market segments.

Zero clients are desktop devices that communicate with datacenter backend processing resources such as virtual desktops or Blade PCs over Ethernet network connections. Zero clients have no operating systems, memory or storage, and feature highly efficient PCoIP protocol that is supported by VMware's Virtual Desktop Infrastructure software program, Horizon 6.

Front view

DVD Accessory	
Random Access Time	200ms
MTBF (Life)	60000 POH
