Line of sight separation from the data center to the desk. NSA/NIAP certified KVM in Zero Client enclouse.
All-In-One Multiple Security Level PCoIP Solution

ClientCube NET-2
Multiple Security Domains

Part Number **Part Description**
XXX Model ClientCube NET-2

KEY FEATURES

Monitor Connections
2 x DP/HDMI

Max Resolution
Client Dependent (4K60)

Other Ports
2 x USB: Keyboard and Mouse
1 x 3.5mm Speaker
Remote/Desktop Control Unit

MARKET LEADING INNOVATIONS

The Secure KVM included with ClientCube NET-2 features unidirectional data flow to prevent upstream USB intrusion; high retention USB connectors to eliminate unexpected cable disconnections; illuminated and color-coded port indicators.

TECHNICAL SPECS

Weight
11.5 pounds fully configured

Dimensions
8" (H) x 11" (L) x 6" (W)

Power
Power Input: DC 12V (CC power brick)
Power Internal: DC 12 V

Environment
Stationary office, home office installation, 0° to 35°

RevM07112022

⟫⟫ MINIMIZED SPACE CONSUMPTION

ClientCube NET-2 is factory integrated at ClearCube's secured facility. ClientCube NET-2 includes two ClearCube endpoints (with options for fiber networks, copper networks, internal CAC reader and more) that are KVM switched (with audio) to one or two high resolution displays. Secure KVM Switch technology enables multiple classified and unclassified routes to terminate at a single set of peripherals at the operator's desk while maintaining physical data separation in the data center. For security officers, ClientCube NET-2 provides line-of-sight isolation from the data center to the desktop.

COMPACT, ALL-IN-ONE MULTIPLE SECURITY LEVEL PCOIP

Following in the tradition of purpose-built solutions for Federal and DoD customers, the ClearCube ClientCube NET-2 endpoint consolidates up to two networks (tactical, secret, confidential and unclassified) into a small footprint device at the desktop, ClientCube NET-2 enables users to access multiple computers and networks using a single keyboard, monitor and mouse while maintaining physical network separation to isolate and secure VMware Horizon desktops and PCoIP Blade PC workstations in the datacenter without compromising user experience or network security at the desktop.

INTEGRATED SECURE KVM

ClientCube NET-2 integrated ClearCube's secure, stateless endpoint devices with Vertiv's NIAP-approved secure KVM (keyboard-video-mouse) switch to create a multi-network workstation like no other. The integrated Secure KVM features true data path isolation for superior security and data protection for government agencies. A common preventive measures for thwarting attacks, KVM switching devices can securely connect peripheral devices - including audio equipment and large high-resolution displays- to switch quickly among multiple computers and networks with a single keyboard, monitor and mouse. The secure KVM is fully compatible with legacy and new government systems and is listed and approved to the latest KVM testing standard (NIAP Protection Profile PSS Ver. 4.0)
