COST EFFECTIVE

Maintaining consistency on a large scale can be difficult for companies who want to leverage a global workforce and third party partners. The CD8808 Thin Client accomdates a diverse set of end users and delivers a secure and efficient device on a centralized and VDI infrastructure. As technology scales within the company, the CD8808 is agile enough to scale with your changes in the infrastructure, data center, and workloads.

GREAT FOR THE OFFICE

Built to look great and still be robust and sturdy, this above-average Intel NUC Mini PC is small enough to carry around and weighs slightly more than a smart phone. Pair it to a monitor, keyboard or mouse or connect it to your television or projector for large-screen viewing and multi-tasking. This powerhouse is ready to take on Microsoft Office, Sharepoint, AND Zoom calls.

FUN WITH MEDIA AND CREATIVITY

The ultra-quiet fan means easy streaming and this ideal device is a balanced mini PC that allows work to get done. This exceptional computer is ideal for users who require a little extra power for applications and programs but don't want to pay an exorbitant price. Its combination of plastic and aluminum make it durable and the mount makes it convenient to place on manufacturing floors.

GREAT USER EXPERIENCE

Users will have a smooth and high-quality experience which allows for watching video, handling high-resolution sites, and the active cooling allows the device to avoid overheating. The built-in WiFi means less cables to trip over or hide. The quad-core Intel Celeron processor allow your company to work smarter and faster from design to distribution.
