FULL PC EXPERIENCE OVER IP

ClearCube CD7522/24M delivers high performance and robust security in a PCoIP Teradici TERA2 computing solution unhindered by distance. The CD7522/24M Zero Client delivers full performance video on dual monitors and connects over fiber networks to VMware virtual desktops, servers, Blade PCs or public cloud resources brokered by WMware Horizon. Traditional, dedicated 1:1 users (where one person uses one dedicated computer) can take advantage of hardware accelerated PCoIP host cards in ClearCube Blade PCs to support legacy, mission-critical, and GPU intensive applications.

The CD7522/24M Zero Client requires no special OS drivers, there are no moving parts that can fail and no removable parts that encourage user tampering or theft. The units support all low speed USB peripherals including multiple monitors, keyboard, mouse, audio input/output devices, and more.

SIMPLE AND SECURE

An additional security feature on the CD7524M includes an integrated PKI-approved CAC reader that supports 5V, 3V, and 1.8V smart cards for enhanced user-to-network and user-to-application authentication and a 100/1000 BASE-X SFP fiber-optic network module (with LC optical interface) to provide increased data security and integrity.

HIGH PERFORMANCE, OPTIMAL QUALITY

The CD7522/24M's powerful TERA2321 chip supports AES-128/AES-256 Suite B Ciphers for exceptional security, one DisplayPort connector and one DVI-I connector, the CD7522/24M supports one display at 4K resolution (DisplayPort only), and two displays at 1920 x 1200 resolution, and full power management with Wake-on-LAN features.
