

**The Trusted Zero Client is our new “zero trust” Zero Client.**

Dual DisplayPort, Fiber/Copper Zero+ Client, 6 USB Ports and an integrated CAC Reader Option.

**Zero+ Client  
CD7032/34T**

**KEY FEATURES**

**CPU**

AMD 1305G (2C/4T, 1.5GHz up to 2.8GHz, 10W, AVX2, Vega3 Graphics)

**Operating System**

HP Anyware

**Video**

Max Resolution Single:  
3840x2160 @ 60Hz  
Recommended Resolution:  
2 x 3840x2160 @ 60Hz

**External Ports**

2 x DP  
Mic+Speaker 3.5mm  
4 x USB 3.0  
2 x USB 2.0  
1 x SFP-Fiber/Copper 1Gbps  
Optional WiFi5  
SmartCard Reader

**Memory**

8GB

**Storage**

eMMC: 64GB

**TECHNICAL SPECS**

**Weight**

1.12 lbs. (0.5 kg)

**Dimensions**

1.5" (H) x 6.5" (W) x 5" (D)

**Environment**

*Storage Temperature: -20°C to 70°C (-4°F to 140°F)*  
*Operating Temperature: 0°C to 40°C (32F to 104°F)*

**Power**

19 V DC

**Physical Characteristics**

Metal housing

**Security**

Kensington Slot for use with Kensington locks  
Integrated PKI approved smart card reader on CD7034T

**Regulatory Compliance**

TAA Compliant

**IDEAL FOR:**

- Government, Military & Defense
- IT Professionals
- Command & Control
- Helthcare, Financial & Insurance

RevM03272024

**Part Number Part Description**

**CD7032T** - CD907032T

**CD7034T** - CD907034T

U.S. White House has directed all agencies to have a plan to adopt a Zero Trust posture by the end of FY241.

**BENEFITS**

Delivers enhanced graphics using HP Anyware software

Manufactured with a unique birth certificate for Zero Trust validation

Compatible with VMWare Blast, VMWare Horizon, Nutanix, KVM, Leostream, Amazon WorkSpaces, Google Cloud Platform, Microsoft HyperV, and physical computer hardware

Smart card reader with SIPR token support  
\*coming late 2024

7 USB ports add-on and DVD drive add-on available

**Rear View**

**SECURITY FEATURES**

Not only do Trusted Zero Clients provide the very best in remoting security, but they also provide outstanding performance. Using PCoIP Ultra version of the software license, Trusted Zero Clients deliver color-accurate, lossless, and distortion-free remote user experience. The software technology automatically adapts to changing network conditions to enable the best possible user experience. It does this by balancing image fidelity, CPU utilization, and network efficiency with multicore CPU scaling to free up valuable CPU resources for heavy workloads and allow for increased server consolidation. However, it is important to note that SIPR token support is not yet available in this version.

**THE TRUSTED ZERO CLIENT IS OUR NEW “ZERO TRUST” ZERO CLIENT.**

Like a traditional zero client, Trusted Zero Clients utilize the PCoIP protocol by HP Teradici. This protocol keeps the data in the data center by transmitting encrypted pixels between the host computer and the endpoint. This has been a critical security feature of zero clients, and it is also present with the new Trusted Zero Clients.

“Trusted” is in the title because these new zero clients adhere to the “zero trust” security principles, as recommended by NIST and similar organizations. To accomplish this, Trusted Zero Clients incorporate these security safeguards:

- First, Trusted Zero Clients come with a factory-provisioned birth certificate that is verified by HP Anyware Trust Center software before the Trusted Zero Client is granted access to the network. Once approved, Anyware Trust Center provides a new operational certificate that is also linked to an active software license. This feature prevents counterfeit devices from being connected.
- Second, firmware is locked down with direct secure boot into the Trusted Zero Clients to prevent tampering with firmware, BIOS, or OS.
- Third, a trusted connection is established with the Trusted Zero Client, and the Anyware Trust Center software continuously monitors the Trusted Zero Client for any potential security issues, such as connected peripherals, old firmware versions, or security breaches. FIPS 140-3 Level 1 and Federated Authentication are supported.
