

The ClearCube Device Management Software

The ClearCube Device Management Software is a web-based tool that enables efficient and simplified management of Trusted Zero Clients. Multiple IT administrators can easily manage, monitor and scale their distributed Trusted Zero Client deployment with an intuitive dashboard, operational metrics, configuration settings, and event logs – increasing IT agility. The software ensures you have complete control over any brand of HP Anyware enabled Trusted Zero Client giving you a single console to manage your environment. The Device Management Software is available to customers who purchase ClearCube Trusted Zero clients and maintain their product warranty for software updates.

Simplify device management

- Flexibility to manage your Trusted Zero Clients in groups with a standard profile and security settings – saving time and resources
- Deploy and manage any brand of HP Anyware Trusted Zero Clients from a single interface and schedule updates with ease
- Ensure effective troubleshooting and proactive problem resolution through a secure management plane

Highly scalable

- Manage Trusted Zero Clients from a single console
- Enable multiple IT administrators to gain simultaneous access to the software with full administration capabilities

Rapid deployment of Trusted Zero Clients

- Ensure ongoing user uptime with the ability to configure new devices quickly and efficiently
- Enjoy an ‘at-a-glance view’ of your deployment with the intuitive dashboard
- Manage trust status of devices centrally

Feature	Description
